NILES BALL TEAM NEARLY ASSURED AS LOCAL MEN RALLY TO GOOD CAUSE

Club Entered In Winter League After First Game Sunday

Undercurrent talk that Niles was to have a baseball team broke out on the surface last week, after Bill Helm, who has long advocated a Niles club, suggested to the Niles Chamber of Commerce that action be taken to have a team in the winter league.

Frank Lewis, Niles enthusiast, who has already secured a number of players, asked Ray Peterson to present the facts to the Niles Chamber Monday, which Peterson accordingly did. The Civic group will think the matter over this week and render a decision at the meeting next Monday.

In the meantime, Niles merchants have voiced their enthusiasm and have promised to furnish suits for the players.

The purpose of the team is to help advertise Niles, and to draw Sunday crowds to the town. The team will be called the Niles Merchants, each suit being emblazoned with the name of the business house that donated it.

Just to prove that all this was not idle talk, Frank Lewis organized a team of Niles players, and last Sunday, without any previous practice, held the strong Hayward Merchants to a score of 2 to 1.

on the Niles Grammar school diamond. Those who saw the game said that the Niles outfit has the makings of a strong team.

To clinch the deal further, Lewis last week went to Hayward and entered the Niles team in the Winter League, thus assuring those who plan to support the team that everything is regular.

Those business houses in Niles that on Monday had promised to furnish funds for a suit are as follows: P. C. Hansen Lumber Company, American Garage, Niles Theater, Ray Peterson, Bert's Barber Shop, Joe's Corner, Quality Meat Market, Dick Carvo, and several others. No doubt many more establishments will get into the parade before the end of the week.

The hastily gathered ball team that held the Hayward outfit to a score of 2 to 1, is as follows: C. C. Pine, P. A. Medeiros, Catcher; Pine, pitcher; A. Medeiros, first base; J. Cahill, second base; L. Pine, shortstop; Wes Raso, third base; George Medeiros, left field; A. Bellini, center field; J. Medeiros, right field; A. Silva and T. Souza.

Without much besides a pregame warmup, the above team proved that Niles has some fine ball players, and future teams heretofore unmolested, will find this new Niles nine can play ball.

MAN CAUGHT IN HEN COOP; GIVEN 30 DAY TERM

A desire to enjoy the company of domesticated fowls has again landed Pedro Cisneros, of Alvarado, in the county jail.

He was taken into custody by Don Bates, Alvarado night watchman at 3:30 Monday morning on the complaint of G. Cosso, storekeeper, who surprised Cisneros in his hen coop. Mr. and Mrs. Cosso, armed with a gun and baseball bat held the miscreant until Bates arrived.

Arraigned Monday before Justice of the Peace Allen G. Norris, Cisneros stated that he just wanted to "play with the chickens." He pleaded guilty to a charge of disturbing the peace and was sentenced to thirty days in the bastille.

This is the third time Cisneros has been in jail for his friendly interest in farm fowl and animals. He was arrested last year, and served ten days for chasing sheep in the Hellwig yards at Alvarado. He later was sentenced to ninety days for terrorizing the horses on a Centerville ranch.

DECOTO CHAMBER MEETS
The Decoto Chamber of Commerce met last night to discuss business at hand, and to hold a not very serious court to judge the participants of a hilarious occurrence at the Men's Club dinner last Tuesday evening. What the occurrence was the writer was unable to discover, but reminiscent chuckles from members of the Decoto chamber tell of something good.

TINHORN RACKETEER LANDS IN JAIL SATURDAY

Niles had a mild taste of out and out racketeering last Saturday, when a man who gave his name as Otto Briendell was arrested after asking several Niles business houses to pay him to "protect the windows of their establishments from breakage."

According to merchants, Briendell was offering to protect the windows from himself, it being his method to enter a place of business and ask for a small sum. If refused, Briendell said he would go outside and break the windows. It is said that several merchants gave him a few pennies to get rid of him without having any trouble.

The would-be racketeer ran up against a tougher proposition when he offered to protect the bank. Officers were summoned and he was booked for investigation at the county jail.

It is said that he was a former Southern Pacific brakeman.

Train Collides With Trailer Early Sunday

Manuel Amaral, Niles truck owner, had the misfortune to lose a wheel of his trailer just as he was crossing the tracks near Overacker Sunday morning.

Unable to move the vehicle from the tracks, Amaral was forced to stand by while a train bore down and crashed into the stalled trailer. Having sized up the situation, the engineer applied his brakes and had almost stopped when he reached the crossing. The trailer was not damaged beyond repair.

RICHMOND RELATES DETAILS OF TRIP TO NILES CHAMBER

Successor to Wilhelm To Be Named This Week, Tells Members

President F. V. Jones opened the Monday meeting of the Niles Chamber of Commerce with a brief statement of the success of the firemen's dance, held last Saturday night in the Garden of Allah. Jones stated that any success that has come to the firemen is entirely due them. He said further that he was glad to see that the town of Niles really appreciates its fire department.

Ray Peterson brought up the subject of the projected Niles baseball team, and said that he would have Frank Lewis, at present manager, tell the civic group details at the next meeting, but it is in the air that the chamber will sponsor the club.

Supervisor Ralph V. Richmond, recently returned from a trip through the eastern states, was speaker of the day. He was called upon by President Jones to tell of his experiences, and what he observed in the east.

According to Richmond, the trip from Niles to Atlantic City, where he attended the Forester's convention, was an extremely hot one. He said that as they arrived in each town on the way, they learned that the day was the hottest in decades.

Richmond was particularly interested in the method for raising money for unemployed relief in the state of Colorado. He said that automobiles were taxed according to their value, the money being taken by the state and redistributed for aid to the needy. He said that the method had met with violent opposition, and was at the present time being tested for its validity in the supreme court of the state.

Richmond told of the ways in which St. Louis had been hurt by such wide publicity of the sleeping sickness epidemic, saying that many of the passengers on his train were afraid to leave the station.

Having visited the Chicago fair, Washington, D. C., and Boston, Richmond had many interesting details to relate, particularly of Boston where he was when the first terrific Atlantic storm struck the east coast.

He visited for a few days in Meadville, Pennsylvania, with George Gregory, a schoolmate of his and formerly a resident of Centerville.

Richmond returned last Thursday in time to sit with the board of supervisors for the appointment of a successor to the late George Wilhelm, county surveyor. Richmond said the appointment would be made sometime this week. He stated that the board agreed that the man selected should be willing to work with the supervisors of the rural districts in order to speed up work pending there.

New Committeeman Is Named For Scout Troop

Scout committeemen of Troop No. 2 met at the home of A. J. Petsche Monday night to select a successor to Rev. E. Brinkmeyer, who tendered his resignation recently.

Clarence Crane, popular Niles garage man, was named to fill the post. Other members of the committee are A. J. Petsche, Ray Peterson, George Rose, Lawrence Pine and Jack Townsend.

Crane, as activity man, already has several ideas to stimulate interest in the troop, and to furnish the scouts with some new fields in which to work. Crane tentatively plans to institute a course in radio transmitting and receiving.

Committeemen made plans Monday to take the troop to the Lakeside plunge some time soon.

SPIDER FANCIERS, ATTENTION, PLEASE

Collecting things as a hobby is a common practice with human beings, and a commendable one, providing the articles collected do not creep around and bite people. But this new idea of carrying poisonous spiders about in glass jars is too much, according to local people who have had occasion this week to enter Clarence Crane's garage.

It seems that Frank Silva and Joe Machado, evidently finding time heavy on their hands, went tarantula hunting Sunday. The result of the hunt is eating small bugs in a glass container on the workbench in Crane's shop. It is said that Machado and Silva surprised a rabbit, and after a brief struggle, in which clothing was badly torn, brought it to town.

To complicate the situation, John Andrade came in, scrutinized the big black arachnid, and said, "Shucks, I'll bet my pet window spider can lick it!" Perhaps some of the other townspeople would like to enter their centipedes, scorpions, and what have you?

IDENTITY OF DEAD ITINERANT NOT ESTABLISHED

All efforts to establish the identity of an elderly itinerant who died in the Western Pacific freight yards have failed, according to word this week from the office of Deputy Coroner F. F. Botelho.

The body was discovered Saturday afternoon, and brought to the office of a local physician. Death was pronounced due to apoplexy.

No papers of any kind were found among the man's possessions, the only distinguishing clues being tattoo marks on the man's arms. The left arm was inscribed with the initials "C.P." and the right with a figure of a dancing girl.

The man seemed to be well equipped for roughing it, his camping paraphernalia was complete.

The body was taken to the sheriff's office to be photographed so that identity may sometime be established.

Death Claims Alvarado Resident Last Saturday

Lawrence Galvin, 76, of Alvarado, passed away at the Hayward hospital Saturday, after a short illness. He was rushed to the hospital September 23, with an acute case of peritonitis. He was the father of Mrs. W. M. Rogers, of Alvarado.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

Of the Township Register published weekly at Niles, California for October 1, 1933.

STATE OF CALIFORNIA
COUNTY OF ALAMEDA] ss.

Before me, a notary public in and for the State and county aforesaid, personally appeared Norman H. Parks, who, having been duly sworn according to law, deposes and says that he is the owner and publisher of the Township Register and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 411, Postal Laws and Regulations.

1. That the name and address of the publisher is:
NORMAN H. PARKS, Niles, California.
2. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are:

NONE

NORMAN H. PARKS.

Sworn to and subscribed before me this 4th day of October, 1933.

Palmyra Lemos, Notary Public.

MEDALS FOR SCOUT LIFE-SAVERS ARE ASSURED, SAYS COIT

Townsend And Pine Are Recommended For Highest Honor

Jack Townsend and Lawrence Pine, Niles scouts who saved the life of John Neves a short time ago, were recommended for the highest honor that can come to a boy scout by the court of honor last Friday night.

Witnesses of the rescue told of the way in which the scouts risked their own lives to bring the Neves boy to the surface. A local physician testified that the methods of artificial respiration used by the scouts was responsible for the reviving of the drowned boy.

After hearing the testimony of witnesses, and hearing the self-effacing accounts of the two scouts, the court proceeded to draw up the recommendations to be sent to the higher court in Washington, D. C.

According to George Coit, local court of honor head, the approval of the higher court is almost a certainty. He stated that the two boys undoubtedly saved a life at the risk of their own. The medals will be presented at a special court as soon as they arrive.

CHURCH HONORS ITS SUNDAY SCHOOL TEACHERS

An outstanding and unusual event took place at the 11:00 o'clock services at the Congregational Church Sunday when the church school teachers were commissioned and duly set aside through consecration to the task of conducting the Sunday school classes.

In stating that such a service is a rare occurrence, Rev. E. Brinkmeyer said those women of the congregation who were willing to furnish their time and help as teachers were deserving of recognition.

A few parents and numbers of friends attended the commissioning.

The occasion was completed by celebration of the periodical communion service, after which Rev. Brinkmeyer closed the hour with an address on "A Charge To Keep."

THIEVES LOOT HADAD'S STORE LAST WEEK-END

BENEFIT DAY FOR TOBACCO FUND DRAWS MANY

Complications arose that sliced the proposed Lion program for last Sunday down to just the baseball game, but that contest attracted multitudes.

Designed for raising funds to replenish the Disabled Veterans' tobacco pouches, the day was a success, a considerable amount being raised.

Chiefly concerned with the preparations for their dance this Saturday night, the Lions are working slowly with details of the Junior Traffic Patrol, Chick Santos, president says that plans for caps, etc., will be completed next week.

For details and box score of the Legion-Lions vs J & F's see page eight, Newark News.

NO ONE INJURED IN NILES ACCIDENT THURSDAY

Mrs. Tony Silva and her two daughters narrowly escaped injury last Thursday evening when the car in which they were riding collided with a car driven by Mrs. Lillian Griffiths at the intersection of First and I streets in Niles.

The collision occurred when Mrs. Griffiths drove out onto First street from I. She crashed into the side of the Silva car, causing it to hurtle over against the curb in front of the Niles Market. Mrs. Silva suffered a mild shock and cuts on one hand.

Traffic was held up for a short time while the damaged machines were being removed from the street.

CANYON BARBECUE
Sam and Frank Alaimo were hosts at a barbecue Sunday at the Rose Warren grounds in Niles Canyon. Twenty friends attended. Mr. and Mrs. Felix Alaimo, parents of Sam and Frank, were guests of honor.

"White Angel" Plans To Have Harvest Festival Near Dublin

Plans for a Harvest Festival to take place in the nature of a Thanksgiving celebration are being planned by Mrs. Lois Jordan, "The White Angel" of the Embarcadero of San Francisco, at her ranch near Dublin. The date has not yet been set for the festivities, says Mrs. Jordan, but it is expected that the exact date will be known within a few days.

Mrs. Jordan returned to her ranch near Pleasanton the first of last week, after a two-month trip in a small boat to South Sea Islands, with her son. Upon her arrival here the White Angel began immediate plans for the celebration.

"Despite conditions as I find them, and taking into consideration the hardships and dangers to which we were exposed on our voyage, I cannot help but feel that there is one who watches over us. It is with this idea in view that I am planning the harvest festival."

Coats, Shoes and Hats Valued At \$100 Pilfered

Having been unmolested by hold-up men and burglars for the many years that he has been a merchant, in Niles, Mike Hadad, on the eve of his departure to Manteca, suffered severe losses when thieves broke into the back of his store and made away with several leather coats, shoes and hats valued at \$100. A moderate sum, left in the cash register, was also missing.

The robbery was not discovered until Monday morning, when Hadad opened his shop to direct removal of the remainder of his goods. Authorities think the robbery was committed some time Saturday night.

No clues were discovered, but police are seeking the whereabouts of a man, said to be an itinerant, who had disappeared from a Niles restaurant Saturday night, after working as a dish washer.

S. F. MAN JAILED ON DRUNK DRIVING CHARGE

Leland A. Warrington, of San Francisco, was committed to the county jail Monday on charges of driving an automobile while under the influence of liquor, after he had been picked up near Mission San Jose Sunday by Motorcycle Officer Duffy Lewis.

It is said that Warrington was driving in an erratic manner minus one front tire when seen by the officer. In answer to questioning, Warrington said he was on his way back to San Jose to have the tire fixed. Officer Lewis glanced into the tonneau, where he saw several bottles of liquor, and on the strength of this and the fact that Warrington was obviously drunk, arrested him.

Judge J. A. Silva gave Warrington the alternative of paying a \$50 fine, committing him to the county jail until he could raise the amount.

Clarence Crane was fairly successful on a dove hunt Sunday.

GETTYSBURG IS PILGRIMS' GOAL

Field of Most Famous Battle in United States.

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

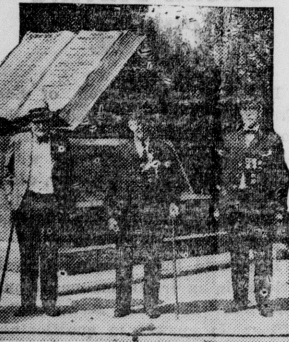

EVERY summer thousands of Americans make the pilgrimage to Gettysburg, famous American battle field and locale of one of the most famous speeches ever delivered—Abraham Lincoln's Gettysburg address.

At Gettysburg, during the first three days of July, 1863, the course of American history, if not indeed the trend of world destiny, trembled in the balance. Here American courage and valor reached a high-water mark; here the hopes of the Confederacy attained their flood stage and began the ebb that ended at Appomattox.

As one motors along the avenues that mark the battle lines, now pausing in reverence before this and that monument erected on the field; now visiting the earthworks of a famous corps, division, or brigade; now climbing one or another of the five steel observation towers for a broader sweep of the terrain, he understands why this is the most widely known of all the battle fields of America, attracting more than 800,000 visitors annually.

Never did any commander face his problem under greater difficulties than did Gen. George Gordon Meade. At three o'clock on the morning of June 28, less than 80 hours before the great battle opened, he was awakened in his tent at the headquarters of the Fifth corps, which he had been commanding. An officer from Washington announced that he had come bringing trouble. Later, in a letter to his wife, Meade confessed that he thought the officer had come to relieve him of his command or to arrest him; but his conscience was clear.

And trouble it was that the officer brought, though of a vastly different kind. He delivered an order from the War department directing General Meade to take command of the Army of the Potomac, concentrate its scattered forces, break the hold of the Army of Northern Virginia on the Susquehanna, protect Baltimore and Wash-

They Fought at Gettysburg.

ington, bring the invaders to battle, and cause them to retreat to their own soil.

General Lee, too, was in straits. Stuart's dash around Hooker's army had deprived the Southern leader of the only eyes an army could have before dirigibles and airplanes came into being.

In those three last days of June both commanders were at a disadvantage—Meade because he had had thrust upon him a Herculean task and must get his hands on the reins, and Lee because his cavalry was beyond his reach.

Two Great Battles.

Few visitors who go to Gettysburg realize that there were two battle fields in that historic struggle. The battle of the first day was fought to the north and west of the town. Not a single federal soldier was left on that field when the fight ended in mid-afternoon. How complete was the Confederate victory on that day was disclosed after the war by General Meade, who said that if General Lee had followed and placed his batteries on Culp's hill that evening the federal army would have been forced to withdraw.

One need only climb the observation tower near the site of General Meade's headquarters and from that vantage point view the second battle field to appreciate the tremendous price the Confederates were destined to pay on the second and third for their victory of the first. For here Nature had provided General Meade with a veritable citadel ready for fortification, in which to await an attack, and events had given the Army of the Potomac time to occupy this position and entrench itself.

Here the legions of Lee endeavored to overpower their gallant foes of many a Virginia battle field. Here they waded through blood at the Peach Orchard and the Wheatfield; here they faced the most withering blasts that war at its bitterest could bring upon them as they struggled for possession of Devil's Den and the rocky heights of Little Round Top, where the issue hung on the quick eye of General Warren

and the matter of a few minutes. Thrice victory eluded the grasp of Lee in the fighting of the second day. Night closed down upon the frightful scene of carnage with the flower of Stonewall Jackson's old corps in Meade's trenches, on the southern slope of Culp's hill, within 150 feet of Meade's line of retreat and close to his reserve parked artillery. There they slept on their arms, little dreaming how close they were to victory, as they settled down to a fitful slumber.

Pickett's Famous Charge.

Could they hold their gains on the morrow and drive through the hundred paces to triumph? At four o'clock the next morning guns boom out their demand for an answer. The battle is on. Artillery fire blasts their front and rakes their flanks. Musket fire throws a deadly leaden hail into them from almost every angle. Their position becomes an inferno. They charge into a blinding sheet of all-arms fire; they reel back, reform, charge, and are hurled back again. Again they reform and charge once more. At last, almost literally blasted from the field, the bugles sound the mournful notes of the retreat and General Meade holds the ground unchallenged.

Pickett's charge will ever live in the minds of men as the climactic episode of Gettysburg; but military men agree that in the menace it held, in the fierceness of the assaults that were made, in the carnage that was wrought, the attack made by the men whom Stonewall Jackson had led at Bull Run, Antietam, Fredericksburg, and Chancellorsville deserves an equal place in the annals of war. That attack lasted six hours. Pickett's charge moved out at three o'clock, reached high water mark at 3:20, began its retreat at 3:40, and was off the field a little after four o'clock.

As a military spectacle, that concluding act has never been excelled. Its prelude was played by 300 guns, as battery answered battery across the gently rolling fields over which the historic charge was to sweep. "Every position seems to have broken out with guns everywhere, and from Round Top to Cemetery Hill is like a blazing volcano," reported one officer. "The grand roar of nearly the whole artillery of both armies burst in on the silence almost as suddenly as the full notes of an organ would fill a church," wrote another.

In an hour and a half the Federals slackened their fire, so that their guns might cool, wrecked batteries be replaced, and the atmosphere allowed to clear.

Forty-two Confederate regiments move out. Pickett leads them, with his own division in the center. The charge begins with the precision of dress parade. A murmur of admiration sweeps the Union line. And then its artillery opens again with every ounce of its reinforced power. Presently torn by shot and shell the charging host comes within rifle range. They press on. They are within 150 yards of their goal, facing death in a thousand forms.

End of the Bloody Fight.

Pickett's men melt like snow on a hot day, but a second and a third wave sweeps on. They face double canister at ten paces, but they silence the guns that fire them. Into Webb's rifle pits they leap and over the barricade. Armistead and his men vault over the stone wall. He falls mortally wounded. The momentum of the charge wanes and dies.

Raked with fire and cross-fire, there is nothing to do but fall back. But they return across the sanguinary field in such fashion that the repulse does not become a rout. Out of the 4,500 men of Pickett's division, not more than 1,000 return. Of the 15 field officers and four lieutenants, only Pickett and one lieutenant escape unscathed.

The Battle of Gettysburg is ended. As one walks over the scene and tries to measure the courage of the men who fought here, he comes to understand why there is pride in every American heart that the battle field is now a military park, and that it was dedicated in immortal words by Abraham Lincoln.

The fine generosity of the Federal government, that knows no North and no South in the marking of these hallowed acres, cements in the firmest bonds of history the sons and daughters of those whose bravery and courage made the field the sacred spot it is.

First established by the Gettysburg Battle Field Memorial association in 1894, taken over by the government in 1895, more adequately marked by the Gettysburg National Park commission, the park now consists of 2,530 acres, of government-owned land. It has 22 1/2 miles of avenues, in addition to the state and county highways that traverse it. In it there are 83 statues, in addition to nearly 800 other monuments. There are also 1,410 bronze and iron tablets and 323 granite markers on pedestals, while 419 mounted cannon, caissons and limbers show the artillery position of the field.

As a recent army report declares: "It has been well said that Gettysburg was in a measure the American soldier's battle, a battle of the

ranks, a struggle of American prowess and courage, of discipline and tenacity, of unswerving fidelity and unselfish devotion, a contest of American manhood."

Boston Capital of New Jersey

Few of the present generation are aware that Boston, Mass., was once the capital of New Jersey. The period in question extended from 1683 to 1692.

Flying Squirrel Depends on His Skin Parachute

One of the most fascinating, yet most elusive creatures is the flying squirrel—a brave little fellow no bigger than a man's hand who volplanes to earth from heights of 50 feet, and does it softly and silently, without seeming to take any chances with his life at all.

The reason that the flying squirrel is seldom seen is that he is a creature of the dark. In the daytime, he hides away in his nest inside a hollow tree, but as soon as the sun begins to sink, he steals out into the open. When dusk first falls, you may see him poke his head out of his hole, and if everything seems clear, you may see him run to the top of his tree, and take a daring leap, gliding to earth in a graceful curve.

As a matter of fact, this squirrel does not really fly, but he depends upon the membrane between his front and hind legs to act like a parachute and slow up his descent. While the true squirrels may always be seen abroad in the sunshine, the flying squirrel behaves just the opposite. Ernest Thompson Seton says: "He has the eyes of an owl and sees perfectly at night."

"Getting Tanned" Simply Aiding the Pigmentation

What we call "getting tanned" is simply a building up of the pigmentation of the skin as a protection against over-exposure. We all are familiar with the way sunlight penetrates a transparent object, but finds difficulty in getting through a dark, opaque substance. The darker the substance is the more light it absorbs, preventing further penetration.

The human body is so constituted that it will, over many generations, produce enough pigment necessary for protection against sunlight according to environment. Peoples inhabiting northern zones commonly develop one degree of protection, while those in more southerly latitudes, where they are subjected to more sunlight, develop another degree. The more southern peoples, even of the white race, generally have darker skins—that is, skins with a greater amount of this protective pigment.

Ovenizing Hams

Ovenizing of hams did not revolutionize the basic way in which smoking was done. It did change certain details in the method of smoking, but the general practice of smoking hams and bacon over hardwood fires is the same as in the past. Those who ovenize hams and bacon state that an explanation of the process involves detail which is technical and complicated. The net effect, however, is to produce hams and bacon with a better flavor, greater tenderness, greater firmness, etc.

Bells and Bells

By ELSIE YOUNGHANS

© by McClure Newspaper Syndicate, WNU Service

THE Princess Alexandria Sophia stirred ever so slightly. She pulled the cover closer around her shoulders. Cold! Cold! Really she must ask Katja to unpack Aunt Anna Karlova's coverlet. That funny cover of lace and fur and silk that Aunt Karlova had spent an entire year in embroidering.

Winter! It must be winter! For suddenly sleighbells were ringing in the streets. Strangely muffled and far away they sounded. Perhaps a heavy snow had fallen during the night. Bells! Bells! Bells! An incessant ringing of them . . . an unending procession of them. Would they never stop! Where were they all going? Ah! But of course! Strange that she shouldn't have remembered. Suddenly it was clear as crystal. How could she have forgotten! Her wedding day! This was her wedding day!

The jingling droschkas were bringing the wedding guests. Schoolmates, friends, officers from Victor's regiment, officials from the court and their families. Why, there must be hundreds of them, thousands of them, there were so many bells! And all coming to celebrate her wedding, her's and Victor's. Yet a strange weight lay on Alexandria Sophia! She felt she was not moving—she was powerless to move.

And now, as suddenly as they had started, the bells stopped. The guests, then, were all assembled—! Ah! Victor, her adorable Victor, he too, would be waiting! How splendid he would look in his uniform of the Imperial guard, all white and gold, with the flashing order of St. Stanislaus upon his breast. Ah, but he was wonderful! Swiftly, swiftly, her thoughts flew back to the day she had met him. It was at the ball of the Dolgoruky palace; she was making her first formal appearance in society. Victor had asked her to lead the procession with him. They had passed through an arch of flags, and instead of returning to the ballroom, he had carried her

Smilin' Charlie Says

"Al Owens says he had t'quit workin' 'cause it wuz too tiresome fr his wife t' keep quiet that long ---"

off to the gardens. Under the willow by the fountain, he had kissed her, and told her she was the most divine lovely thing God had created. And now here at last, she and Victor were to be married—never, so Victor had sworn, would he allow her to part from him.

But suddenly, more guests seemed to be arriving—there were the sleigh-bells again. The wedding banquet must be already spread in the great hall. But she, Alexandria Sophia, the bride, she was not there. Where was she? Oh, where was Katja? Why didn't Katja bring the wedding dress, that shimmering thing that had been sent from Paris? Where was the veil with headress of pearls that had been worn by her mother, and her grandmother, and by countless Orlofski brides before them? Why this strange sense of impending doom in Alexandria Sophia's heart! Why this pain, this anguished foreboding—this heavy, heavy weight!

Sleighbells! Sleighbells! Would they never stop? Was all of Moscow coming to her wedding? And she, the bride, not ready—not ready! Ah! They were calling her—it seemed she was hiding somewhere. They were coming for her, some one was pounding at the door, shaking it. Dear God! Some one was breaking in. Why, she had been asleep, fast asleep! Her eyes were still dazed, her mind vague.

Some one stood on the threshold. Katja? good old Katja with the wedding dress? But, no, of course it wasn't Katja. . . . It couldn't be Katja. The little princess was wide awake at last. . . . rushing with a shudder into the complete awareness. A slovenly woman in a faded wrapper stood before her. She was holding out a thick white cap and talking: "See, dearie, it's coffee I'm after bringing up to ye. I feared as ye'd oversleep this morning, it was so late you got in last night, poor lamb, poor little lamb."

Ah! Awake! How terrible to be awake! To realize the truth! To know that she was only Sophie Orloff, apprentice at a dressmaking establishment, that she lived in a hall room in Mrs. Murphy's boarding house on Lenox avenue, that she had overslept and would be late to her job. And bitterest of all, to remember that she is no longer young, no longer beautiful, that no one in all the world really cares what happens to her.

Victor? Katja? Aunt Anna Karlova? Where were they? The Dolgoruky palace, court balls, wedding veils of lace, silken coverlets? Gone, gone! Porzo Mo! Long and long ago had they all vanished. War, revolution, Red fury had annihilated these dear people—these once familiar things. They had vanished utterly, but she was left, to live on, adrift, alone.

But suddenly the muffled bells again. Now at last she knew their real meaning. With a despairing gesture, she pulled an alarm clock from under the pillow and threw it against the wall. "It didn't wake me at all. It made me dream. . . . Ah, Mrs. Murphy. . . . It is not good to dream of sleighbells in my Russia!"

A marriage license is denied to Turkish applicants until they present a certificate showing that they know their new alphabet.

Firefly's Illumination Puzzles the Scientists

Once it was thought that phosphorus was the cause of the luminosity of the firefly and its larva, the glow-work, and the phenomenon was called phosphorescence.

But the substance of the luminous zones of these curious beetles has many times been exhaustively analyzed for phosphorus, without an indication of its being found, and the real nature of the firefly's glow remains a secret.

The key to the solution seems to lie in the fact that curious fats, oils and other substances exhibit luminosity when permitted to combine with oxygen in an alkaline solution. Just what takes place here is not known, but it is a form of combustion. In laboratory experiments the contact also produces a measurable amount of heat, while in the firefly and in luminous fishes and plants it does not appear to do so.

The light-producing organs of the firefly are unquestionably arranged to bring about this union of oxygen and a fatty secretion. The seat of the light is intensely luminous areas located in the abdomen or thorax. Each is a specialized portion of the fat body, a plate situated directly beneath the skin, and supplied with nerves and fine tubes connecting the trachea or windpipe.

The cells of these fatty places secrete, under the control of the nervous system, a substance which is burned during the appearance of light. This combustion takes place by means of the oxygen conveyed to the cells by the fine tracheal branches.

Porcupine Does Not Hurl Quills at Its Enemies

That a porcupine throws its quills is a common error, made by Longfellow in his poem "Hiawatha" when he said: "From a hollow tree the hedgehog. With his sleepy eye looked at him, shot his shining quills like arrows." The quills are loosely inserted in the skin and may be detached by a violent shaking of the body or by contact with other objects. When attacked the porcupine thrashes about actively with its tail, often causing quills to be detached and embedded in the flesh of the attacker. John Burroughs says: "Touch his tail and like a trap it springs up and strikes your hand full of quills. The tail is the active weapon of defense; with this the animal strikes. It is the outpost that delivers its fire before the citadel is reached. It is doubtless this fact that has given rise to the popular notion that the porcupine can shoot its quills, which, of course, it cannot do."

Running Water Not Always Pure

That running water purifies itself is one of our oldest sanitary axioms—and yet the suggestion it carries is entirely wrong, says "How to Live." Standing water purifies itself to a much greater degree and in a shorter time. Pollution consists almost entirely of solid material in particles of various sizes. In quiet water these particles settle out, carrying most of the germs with them. Running streams keep themselves constantly stirred up and any pollution they receive is carried for a long time. It is not wise, therefore, to trust water that comes from a pretty spring or waterfall. The only safe principle is not to drink from country supplies at all, or, if this cannot be avoided, to do so only after the water has been boiled.

Prehistoric Burial Place

A prehistoric cemetery, which is believed to be four or five thousand years old, has been discovered at Asnières, on the outskirts of Paris. Workmen, digging the foundations for a new building, found in a bed of sand enormous blocks of stone and human bones. Many completely fossilized bones have been dug out and deposited at the Mairie. One interesting point about the discovery is that it shows the care with which our prehistoric ancestors buried their dead. One block of sandstone, weighing nearly two tons, indicated that men must have pushed it, probably on rollers, for many miles in order to make a worthy monument.

Bees and Noise

Some beekeepers believe that any loud noise, such as shouting, ringing bells, beating pans, etc., will make bees settle. The Department of Agriculture has declared: "No one knows yet whether bees can hear or not, at least no one has ever discovered their hearing apparatus. A person is wasting his time when he hammers on a dishpan to bring down a swarm of bees." While it is a very old belief or superstition that bees can be made to settle by this means, it is at least questionable as to whether the bees hear any of the noise.

Blood Test for Intoxication

In Norway drunkenness is proved scientifically, right at the police station. A drop of blood is examined for alcoholic content and if it contains 2.61 per 1,000 of alcohol the man is intoxicated.

Gypsies

Gypsies are known all the world over as a wandering people. In many languages the word "gypsy" has become synonymous with "vagabond," "tramp." In the Soviet Union a gypsy alphabet has been created. There are gypsy newspapers, a gypsy theater, scores of gypsy schools where children are taught in their native language. The gypsies have settled down, they till the soil, work in factories and jointly with the other 168 nationalities of the U. S. S. R. take an active part in the creation of a new life.

Gambinus

Gambinus was a mythical Flemish king who is credited with the first brewing of beer. His name is usually derived from that of Jan Primus, i. e., Jan (John) I, the victorious duke of Brabant (1261-94), who was president of the Brussels guild of breweries; his portrait with a foaming glass of ale in his hand had the place of honor in the guild hall, and this led in time to the myth of the beer king, who is usually represented with a tankard in his hand.

Light Faster Than Sound

Light waves travel nearly a million times faster than sound waves, their respective speeds being 186,264 miles a second against 1,088 feet a second. The speed of light is constant, while that of sound waves varies somewhat according to temperature. Sight and hearing are merely the means of registering on the consciousness the presence of light and sound waves.

Fixing Price of Gold

On April 2, 1792, congress fixed the price of gold at \$19.30 an ounce. This was maintained, with the exception of the period between August, 1814, and February, 1817. On June 28, 1834, the price was fixed at \$20.67 an ounce, and this price was maintained except during the panics of 1837 and 1857, and for the period of February 25, 1862, to January 1, 1879.

Legality of Lobbying

The First amendment guarantees the right of people to petition the government. When lobbying is simply the attempt to influence legislation by petition, or by a statement of one's side of a case, it is entirely legitimate. When it stoops to intimidation or bribery it ceases to be legal.

Mount Rainier Park

Of all the attractions of the Pacific Northwest, none is more inspiring than Mount Rainier park in Washington. There are 420 square miles of mountain wonderland, 28 glaciers, spectacular waterfalls, a riot of wild flowers and one of the highest mountains in the world.

Do Not Live on Air

It was a belief among the old naturalists that chameleons existed on air. This is not true. The fact that these creatures are able to go without food for long periods no doubt led to this erroneous earlier conclusion.

Oldest Railroad Station

Mount Clare in Baltimore is the oldest railroad station not only in the United States but in the world. It was built in 1820. It is now used as a freight station.

Swords From Heaven

It is believed that ancient traditions of certain fine swords being sent from heaven can be explained by the fact that they were made from meteoric iron.

The Port of Pompeii

Excavations have brought to light what was once the port of Pompeii. In a tavern were found the skeletons of three men trapped while drinking wine.

Soldering an Old Art

Soldering has been found to be one of the ancient arts. It was used to stop up holes and seal joints during the Eleventh century.

Nuptial Arbor Day

Newly married couples in Horschel, a German town, have to plant two fruit trees for the municipality to celebrate their wedding.

The Great Man

A great man is great by thinking great thoughts; and if we cannot think his thoughts, we cannot know his greatness.

First Arithmetic Book

The first arithmetic book printed was Bishop John Sherwood's "Ludus Arithmetice-Machinae" in Rome, in the year 1482.

Air Route Over Ice-Cap

The shortest air route between Britain and North America is over the ice-cap of southern Greenland.

Who Can Prove It?

There are regions in Siberia where the ground is perpetually frozen, hundreds of feet deep.

Satisfied to Live

Men are prepared to accept any conditions so long as they can manage to live.

ALVARADO WEEKLY NEWS

SACRAMENTO HOME
Mr. and Mrs. Peter Cordoba, Mr. and Mrs. Joe Priego and family and Mrs. Mary Cordoba motored to Sacramento Sunday and visited with Mr. and Mrs. David Cordoba. Mrs. Mary Cordoba will remain in Sacramento and make her permanent home there.

PROWLER CAUGHT
Mrs. Nell Hinkley reported a stolen rug and doormat Sunday evening. Several chicken yards were disturbed by a prowler who was later caught.

Mr. and Mrs. Joseph Silva and children motored to Atwater Sunday where they visited with Mrs. J. A. Bettencourt.

LEAVES FOR FAIR
Miss Jeanette Richmond left Sunday to attend the World's Fair in Chicago. She left by rail. Miss Richmond has been employed at the Fairmont hospital in San Lorenzo for the past five years.

Alvarado Personals
Mr. and Mrs. Manuel Lemos and family, of the Alvarado Creek road, attended the NRA parade in Oakland on Friday evening.

Mr. and Mrs. Charles Baird, Miss Helen Baird and Mr. George Kubler motored to Antioch Sunday where the men enjoyed bass fishing, each returned with their limit of bass.

Mr. Andrew Anderson and Mr. Manuel Hendricks spent Sunday bass fishing at Bay Point.

Work has begun on the new ball diamond located on the Centerville highway close to town. A fence, bleachers and backstop will be under construction shortly.

The Misses Madeline Dutra, Irma Machado, Dorothy Chrysostomo, Constance Gomes, Minnie Gomes, Antone Rose, Beatrice Machado, Madeline Avila and Bernice Flores of the Children of Mary Sodality attended an interesting meeting of the Alpha Sigma society at the home of the Sisters of the Holy Family in San Jose on Sunday afternoon.

Mrs. Clara Jacinto visited with her niece, Mrs. Vera Fontes, in Newark on Sunday. Mr. and Mrs. Fontes are formerly of Sacramento, they are now making their home in Newark where Mr. Fontes is employed.

Mrs. Pauline Silva, of Niles, visited with her sister-in-law, Mrs. Frank Silva on Monday afternoon.

Mr. Henry Miller, with a number of relatives and friends, surprised Mrs. Henry Miller with a birthday party at their home here on Saturday evening.

The Alvarado Church Bazaar is slated for the latter part of this month says Rev. Father Bray.

INA ZWISSIG BACK FROM THREE-YEAR EUROPEAN TRIP

After a three-year sojourn in Europe, Miss Ina Zwissig, of Niles, arrived in San Francisco Monday on the Panama liner, Virginia, after an eventful voyage from the east coast.

Miss Zwissig relates experiences on the trip, telling of the terrific hurricanes encountered in the Gulf of Mexico. So rough was the passage, that many passengers, including Miss Zwissig, were thrown from their berths. Several of the passengers were severely injured.

Miss Zwissig has been abroad for three years. She went primarily for her health, and has been studying languages while traveling extensively on the continent. She spent several months in Germany, England and France.

She plans to take up her residence with her mother, Mrs. Agatha Zwissig, near Decoto, and will continue with her language studies this fall.

Natural Gas

Naturally THE BETTER FUEL

CALIFORNIA climate presents a heating problem that demands easily controlled heat.

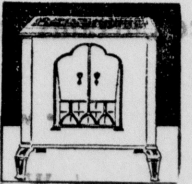

There are no long severe winters. Heat is needed for short periods and it must come quickly. To build up a big fire means wasted fuel. For quick-acting heat that warms floors and walls and circulates into every room corner, climate-wise Californians, rely on Natural Gas—naturally the better fuel.

Gas is piped directly to the furnace or heater and there is no bother to order or handle it. Natural Gas Heating equipment, too, was developed for California homes. Each of the newest types of equipment have known heat-output ratings ranging from the smaller space heaters to the full automatic warm-air furnaces. Investigate and see. Get the facts.

Floor Furnace

Solves the heating problem for homes without a basement. Highly praised by thousands. Saves floor space and is easy and most economical to install and operate.

Circulating Heater

Attractive, low in first cost and highly efficient. It heats two to four rooms. Made in many sizes and styles. Extremely economical to operate.

INFANT SUCCUMBS

Francis Nagai, sixteen day old daughter of Mr. and Mrs. Nagai, died last Thursday.

Mr. and Mrs. J. Brown attended the American Legion and Women's Auxiliary meeting in Niles Wednesday. After the meeting lunch was served and later everyone enjoyed dancing.

Mr. and Mrs. Ed. Victor, of San Francisco, spent the week visiting with their aunt, Miss L. Rose.

Mr. and Mrs. Joe Laurence and Caton Lawrence and daughter, Alice, motored to Modesto Sunday to visit Mr. and Mrs. J. M. Bispo.

Mr. and Mrs. M. L. Silva and family attended the picnic at Alum Rock Sunday, and went to a theater that evening.

Kenneth Faria, Manuel and Filbert Silva, Edna Duarte, Ernest Duarte, Dorothy Carlos, Mr. and Mrs. Faria and daughter, and Joe Perry attended a dance in Mission San Jose Saturday.

John Breitweiser, accompanied by Bert Cook, of Irvington, motored to the San Joaquin valley last week to visit friends.

Mr. and Mrs. Jack Brar motored to Stockton Tuesday.

Mrs. J. H. Leal and Mrs. F. Vargas attended a U. P. P. E. C. meeting in Irvington Thursday.

Irvington Register

By ANNA BETTENCOURT

Dr. E. Grimmer has been away on a fishing trip for several days.

M. and Ms. Vanbuskik, of Oakland, visited E. Ismert on Sunday.

Mrs. M. S. Raymond is staying with her mother, Mrs. M. Frietas of San Leandro.

Mr. and Mrs. John Taylor moved to the DeCosta apartments Saturday.

HOCKEY GAME

Hockey teams of Centerville and Irvington boy scout troops will meet in a match roller game on skates Thursday evening, October 5, at the Maple Rink.

Mr. and Mrs. Elmer Nordby attended the county council of the American Legion and Auxiliary which was held in the Veterans' Memorial building in Oakland Wednesday evening.

Louis Dutra and Anthony Avilino spent the week-end in Daly City.

Misses Anne and Evelyn Marshall attended an Oakland theater Sunday afternoon.

Mrs. Ray Francis, of San Francisco, visited Miss Rilda Francis last week.

Luico Campos, Wayne Day, and J. S. Bettencourt went on a fishing trip Sunday and each caught a limit of bass.

P.T. A. Holds Meeting At Pleasanton Last Week

Fifteen new members were taken in to the Pleasanton Parent-Teachers' Association at a meeting held at the Pleasanton grammar school last Wednesday afternoon, according to Mrs. William Hall, president.

Members of the association agreed to co-operate with the Junior Chamber of Commerce in their NRA contest.

They also discussed plans to fix the basketball and volleyball courts at the Pleasanton grammar school. Members are planning to maintain a safety squad on the play grounds of the grammar school.

The next meeting will be held at the grammar school cafeteria on October 18 at 2:30. All mothers are invited to attend.

WOMEN'S IMPROVEMENT CLUB HOLDS MEETING

Marking its first meeting after the summer vacation the members of the Pleasanton Women's Improvement club met at the City Hall last Tuesday afternoon to discuss business to be done by the club this fall.

The members decided to sponsor "The Ghost Train," a play to be given by the Pleasanton Masquer's Dramatic club. The play will not be presented until the early part of November.

Following the business meeting refreshments were served. The hostesses were the Mesdames A. B. Pickard and Mary Stovall.

Banker, Well Known In This Locality, Passes

Roscoe W. Westover, once well known in Washington township, passed away at his summer home in Guerneville last Saturday. He is survived by his wife and two married daughters.

Onetime president of the Calistoga bank, Westover, was prominent in banking circles in the east bay. He was formerly head of an Alameda bank.

The funeral, under the direction of the Chapel of Palms, Centerville, was held from the Chapel of Chimes, Oakland.

KNOCKS AT WRONG DOOR; ALMOST JAILED

Failure to knock at the right door almost landed John Amaral, of San Leandro, in jail Monday night, when Constable Tom Silva was hastily called to Newark by neighbors of Mrs. Arthur Burcell, as Amaral was demanding entrance to the Burcell home.

Upon questioning, Amaral proved that he thought the Burcell home was his brother's place, for which he was looking. He was one block wrong.

Mrs. Burcell and her daughter, alone in the house, did not go to the door when the knocking began. The uproar that followed was designed as a joke on the brother, Amaral stated. He was not held.

FIFTY HEAR TRAVEL TALK BY MISS SANDHOLDT

More than fifty members of the Women's Country Club heard the talk given by Miss E. Marie Sandholdt Tuesday afternoon at the Centerville clubhouse.

Miss Sandholdt, recently returned from a world tour, followed her itinerary in her talk, telling of customs, conditions and interesting places in Hawaii, Japan, China, India and Egypt. Of particular interest to Miss Sandholdt was the complete lack of militaristic display in Japan. She told of the extreme poverty of certain classes in Shanghai, and of the wonder of India's temples. According to Miss Sandholdt, the Sahara desert is one of the world's coldest places at night. Her address was vividly delivered.

Music at the meet was furnished by John Accinello, of Alvarado, who played three enjoyable accordion solos—the Tango Del Rosa, Trieste Overture and one other.

It was announced to the members that the first program of the dramatics section will be presented the afternoon of October 17. A talk on nature study, by Mrs. A. Rhinehart is slated for October 31.

Mrs. J. R. Whipple announced that the garden section will meet at the California Nursery Adobe tomorrow. All interested are invited to attend.

A sale of fall bulbs was held at the meeting Tuesday, the proceeds to go for the replanting and upkeep of the clubhouse gardens.

The next regular meeting of the club is scheduled for November 7. The main discussion and talk of the day will be on California history and landmarks.

CROW CANYON PICNIC

A large number of the members of Centerville lodge Knights of Pythias, and their families, attended a picnic at Bjorgensen Park in Crow Canyon Sunday. The affair was sponsored by the Dramatic order of Knights of Khorassan, the playground order of the Knights of Pythias. All who attended report a most enjoyable time, with the afternoon spent with dancing, games and other amusements.

Personal Items

Frank Dusterberry, Jr., was the week-end guest of Clarence Graham at the latter's home in Palo Alto. They attended the Stanford-UCLA game Saturday afternoon.

John H. Crothers, editor of the Humboldt Times of Eureka, was the guest of Mr. and Mrs. Frank Dusterberry Saturday.

Loren Merriott of the Bank of America staff, has returned with his family from a month's vacation spent in Idaho. They are now occupying a cottage opposite the Washington Union High school.

Mrs. Laura Elsey, in charge of welfare work in Washington township, has been named by the board of supervisors of Tuolumne county to take charge of all welfare work there.

Mr. and Mrs. George Emerson spent the week-end at Paradise Park.

John Siyor, of Tomales, is visiting his daughter, Mrs. Rose Furtado.

ALUMNI BEATS WUHS VARSITY BY 12-0 TALLY LAST FRIDAY

Aerial Attack Too Much For Cornhuskers; Passes Score

Regli's Cornhuskers showed flashes of form that give promise of effectiveness in future games. When they held a powerful alumni eleven to a 12-0 score at the Washington Union High school field Friday.

Particularly good was a reverse around the short side. Ed. Rose, halfback did some nice ball carrying. Muniz played the last half with a bum knee, but his tackling was the best on the field. Louis Manuel at center did nice work on defense, smashing through time and again to gum up the Alumni offense.

Contrary to current rumor the Alumni would fold up in the second half, said Alumni scored one touchdown in said half, much to the consternation of the spectators.

Red Blacow's team, made up of graduates from as far back as 24, had a fine passing attack.

Ruschin, who played through the game with a sprained ankle, seemed to have no trouble at all in placing the spheroid in the waiting paws of Ken Ferry, who electrified the customers with his catches. The Ruschin-to-Ferry combination worked four times, twice putting the Alumni in a scoring position.

The first score came in the second quarter, after Bud Ruschin had grabbed a pass from Gronley and galloped to the eight yard line. On the next play, Paul Aust went up in the air to snag a pass right in the midst of the Cornhuskers' secondary. He fell over the line for the tally. Gronley's attempt at conversion hit one of the uprights and bounced back.

The second tally came in the last quarter with a forty yard toss from Ruschin to Roy Goularte. The place kick went wide.

The Cornhuskers threatened once when an Alumni kick was blocked and rolled back to the seven yard line. The high school boys were unable to punch it over, however, and the threat passed.

Ray Bettencourt, for the Alumni backed up the line like a Santa Fe freight engine, and whatever got by Fritz Swanson, Logan and Trout, was stopped hard by Bettencourt. Sam Kearns played a nice game, as did Bally Pine, Fontes, Solt and Nakamura.

Red Blacow said after the game the best Alumni team in years beat the best high school team in years.

Following are a few unofficial statistics:

W.U.H.S. Alumni	
Yds. from scrimmage	72 223
No. passes attempted	7 19
No. passes completed	0 8
Yds. gained from passes	0 153
First downs from scrim.	2 12
Yds. lost by penalties	0 30

Starting lineup for Washington: LE, Medeiros; LT, Sinclair; LG, Wilson; C, Manuel; RG, Dinsmore; LT, Phippen; RE, Kato.

Q. Raso; LH, Rose; RH, Muniz; F. G. Medeiros.

Referee, Agosti; Head Linesman, Maloney.

During the early part of this week, Regli put his team through a series of workouts to polish off the offense for the game tomorrow with Santa Clara. The Cornhuskers have improved vastly since the beginning of the season. The game tomorrow should give the boys their first taste of power, and after that all of their opponents will once more call Washington's team, "The Big North-erns."

Alvin Gomes of the Bank of America staff, is enjoying a week's vacation.

Mr. and Mrs. M. S. Bettencourt, accompanied by Mr. and Mrs. W. J. Furtado and Lillian Avila, spent Sunday at Neptune beach.

CENTERVILLE K. C.'S HAVE "ATHLETIC PROGRAM"

Boxing gloves flew thick and fast at Parish Hall recently, as the Centerville Council Knights of Columbus enjoyed their first "Athletic Night."

Previous to the boxing matches which featured the evening, the assembly heard addresses on the Catholic Youth Organization, by Monsignor McElroy and Father Poulsen.

The bouts, four in number were under the direction of Tom Maloney, who secured the fighters through Jaquin Vienn, of Santa Clara, manager.

Refreshments were served at the close of the evening.

All sixty of those in attendance stated their enthusiasm over the program, and said that another should be held soon.

Centerville Personals

Mrs. Earl Marshall established the first dairy in Washington township in 1850, at the Mission San Jose. She realized marvelous returns, selling milk at 25c a quart.

Two hotels were built in Mission San Jose in the year 1850. They were called the North Hotel and the Red Hotel. The lumber for the Red Hotel came around the horn.

Flour from "Hornor's Mill at Union City" was awarded the premium for excellency by New York merchants in the year 1853. It was chosen from among eight samples of California grain flour.

In the month of May, 1852, following the establishment of Alameda county, the first election of officers took place. It was called the "steeple chase," there being six or eight candidates for each office. Whigs and Democrats were the political parties at the time.

Farm Bureau To Hold Election Of Officers Soon

Officers of the Pleasanton-Livermore Farm Bureau will be elected at a meeting to be held next month in Livermore according to reports received this week from John Busch, of Pleasanton, chairman.

Chairman Busch appointed E. A. Wente, Walter Block and A. E. O'Donnell on the nominating committee.

At a meeting held recently at the Pleasanton City Hall methods of stopping the alfalfa weevil infestation were explained by Professor Michelbacher of the University of California.

W. B. Kirk, of Niles, county horticultural inspector, stated that the easiest way to stop the damage done by the pest is to cut the alfalfa as soon as possible. He stated that it can be controlled by dusting the crop with arsenic. According to reports the weevil will not become a very serious pest in this community because it cannot survive in hot climate. It was stated that it may become more serious in Niles where the climate is cooler. Professor Michelbacher states that the weevil was first started in Europe. It was first noticed in the United States in 1904 in an alfalfa field in Utah. The infestation according to investigations has been in this community for about six years, but was first noticed in May 1932.

The bureau will hold a boosters banquet at a Livermore hotel jointly with the members of the Livermore Farm Bureau on October 18. The purpose of the affair will be to stir up interest in the bureau and to secure new members. Walter Block, of Livermore, was appointed chairman of the membership drive.

Economy in printing is penny wise and pound foolish.

For Pain Relief In Minutes

Demand And Get

GENUINE BAYER ASPIRIN

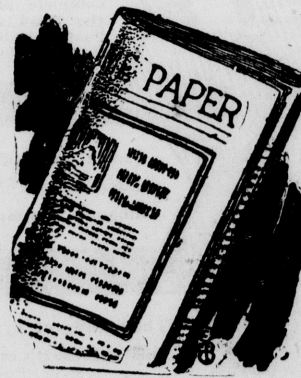

Because of a unique process in manufacture, Genuine Bayer Aspirin Tablets are made to disintegrate—or dissolve—INSTANTLY you take them. Thus they start to work instantly. Start "taking hold" of even a severe headache; neuralgia, neuritis or rheumatic pain a few minutes after taking.

does not harm the heart. So if you want QUICK and SAFE relief see that you get the real Bayer article. Always look for the Bayer cross on every tablet as illustrated, above, and for the words GENUINE BAYER ASPIRIN on every bottle or package.

RALPH RICHMOND RETURNS
Supervisor Ralph V. Richmond returned to Niles last Thursday morning after a month's trip in the east. Going primarily to attend the Foresters' convention in Atlantic City, Richmond visited in several eastern cities on his return trip.

-- Local News Briefs --

Mr. and Mrs. J. C. Shinn, Jr., were guests of honor at the home of Dr. and Mrs. E. C. Grau Saturday evening. A number of Niles people attended.

Mr. and Mrs. Roland Bendel will attend the St. Mary's-California football game at Berkeley Saturday afternoon. Previous to the game they will lunch with Mr. and Mrs. H. F. Grey at the latter's Berkeley home.

A large number of Niles people spent Sunday at Newark, where they saw the composite Legion-Lion team play the champion J & F ball club.

Joe Machado and Frank Silva went dove hunting Sunday afternoon.

Harvey Braun spent Sunday fishing in the straits. He caught several nice bass, the largest weighing 3 1/2 pounds.

Frank Tochini has taken over the management of the Quality restaurant in Niles.

Mr. and Mrs. P. H. Moore celebrated their thirtieth wedding anniversary at a dinner at their new home Sunday.

Mrs. Florence Macpherson, formerly of Niles, writes to friends here that she is well.

Mrs. Fred Varden, Mrs. Dan Marble and Miss Verna Orcutt spent Friday in San Francisco. They called on Mr. and Mrs. F. Lively.

Ex-president and Mrs. Herbert Hoover passed through Niles recently, evidently on their way to their Palo Alto home.

Joe Piolet left Sunday morning for a hunting trip in the vicinity of Forestville. He will return Saturday.

Jack Nebriega will attend a meeting of the Safeway store managers to be held at the Oakland Auditorium Saturday evening.

Mr. and Mrs. Ed. Rose have moved back into Niles from their summer home on their ranch.

COMMITTEE CHAIRMEN FIREMEN JUBILANT FOR AUXILIARY APPOINTED OVER SUCCESS OF DANCE

Committee chairmen for the Auxiliary Post No. 195 were appointed Tuesday night at the first meet of the fall season, held at Memorial Hall, Niles.

President Geneva Smith opened the meet and appointed the following: Poppy chairman, Past President Lena Bertolotti; Rehabilitation chairman, Florence Nordby; Child Welfare chairman, Rose Vieux; Publicity chairman, Nell F. Myers.

Delegates to the county council were elected. They are: President Geneva Smith, Florence Nordby and Past President Lena Bertolotti. Alternates selected are: Doris King, Agnes Borges and Marian Zwissig.

The parliamentary and Americanization chairman have not yet been named.

Plans were discussed for the annual card party to be held December 5 at Memorial Hall.

Well satisfied and grateful are the Niles firemen as they contemplate their fat money bags this week following the tremendous success of their dance at the Garden of Allah last Saturday night. So complete was the ticket sale previous to the affair that the arrangements committee found it necessary to have additional digits printed. The hall was filled to capacity. It is estimated that more than three hundred couples attended.

Funds from the dance have been banked in the name of the Firemen's Club, so as to be used as necessity demands by that organization. A considerable sum will be laid aside for the sick fund and for donations to other organizations, such as the boy scouts, etc.

The density of the crowd, and the shuffle made it necessary for the committee to bring the microphone system into play, so that the music of Doc Hanley's orchestra could be heard in all corners of the pavilion.

Expressing their gratitude to the community for the splendid support of their evening, the firemen state that they will not allow such a long interval to pass before giving another.

IRVINGTON CHURCH RUMMAGE SALE OCTOBER 7

The women of the Irvington Community church will hold a sale of home-cooked foods on Saturday, October 7, in the building next to the Irvington post office.

The welfare committee appointed at the last meeting of the Church Women's Association will be on hand at the food sale to receive contributions of clothing for distribution to needy families.

It is hoped that Washington township people will recognize the worthiness of this cause, and turn in quantities of warm garments that are at present time merely taking up closet space.

Rummage through your closets and bring the unused clothes to Irvington October 7.

On Sunday there will be Rally Day exercises. Recitations by children and an address by Dr. Duncan, Director of Religious Education for Presbyterian Work in the Bay Region.

FOREIGN STUDENT FINDS INTEREST IN PEST CONTROL

F. Buzzo, sent to California by the Albanian government for the purpose of observing the effective methods of mosquito control practiced in Alameda county, is this week in the field with Harold F. Grey, mosquito district head. Buzzo has stated his particular interest in the methods of drainage and the construction of proper ditches to insure against the collection of surface waters in low places.

In taking the Albanian representative about the potential mosquito breeding districts in southern Alameda county this week, Grey explained the necessity of repeated oilings in many places where larvae have been observed to survive the initial spray.

Buzzo says that the problem of controlling the pests in his country is a complicated one.

Traffic Officers To Hold Barbecue At Pleasanton

Reservations are being made to feed over one thousand members of the California State Highway Patrol at a barbecue to be held at McKinley Park, Pleasanton, on October 18, according to reports received from Joseph Macer, Pleasanton highway patrolman, who is in charge of the arrangements. On October 17th and 18th the California highway patrolmen are holding their convention at San Francisco. They expect to come to Pleasanton in the morning of the 18th and will spend the whole day here, where an immense barbecue will be held.

Joseph Macer, of Pleasanton, and Harold Atkins, of Livermore, both members of the highway patrol are in charge of the barbecue. They are being assisted in their work by John J. Amaral, of Pleasanton.

Second Regular P.-T. A. Meet Tuesday Afternoon

The Niles Parent-Teachers' Association will meet next Tuesday afternoon for the second regular meeting of the fall term, according to Mrs. Roland Bendel.

The meeting will be predominantly a business one, with some small program to be arranged later.

Members of the association have stated their satisfaction of the results of the benefit card party given recently for the purpose of raising funds to carry on the dispensation of free lunches and milk to needy children. The members say that an attempt will be made this winter to aid in providing clothing for unfortunate youngsters.

HAGSTROM PICNIC
Fred Rose was host at a huge Hagstrom Food Stores picnic held at Rose's ranch Sunday. More than 1000 people attended.

COMMENTS POLICY

Daniel Marble, Niles Service Station, Niles, claims satisfied customers are the independent dealers' biggest asset in building good-will. Says Richfield's policy favors independents and he favors Richfield.

HOUSE WARMING IS GIVEN TO MEZZA'S

Mr. and Mrs. Tony Mezza, of Pleasanton, were given a surprise house warming party at their new home on Second street last Saturday evening.

The party was arranged by the Niles Rebekah lodge of which Mrs. Mezza is a member. Those present enjoyed playing pedro. Late in the night refreshments were served. Mrs. Mezza was presented with a gift by the Rebekahs.

Those present were Mr. and Mrs. Elmer Sorensen, and Mr. and Mrs. C. Plumb, of Hayward; Mr. and Mrs. Fred Mittie, Mrs. Rose Fournier, Mrs. Roland, Mrs. J. Parry, Miss Martha Crane, Mrs. E. Kanard and Mrs. Mary Bernard, all of Niles, and Mr. and Mrs. Morris Walker, of Valle Vista.

CATHOLIC BAZAAR TO BE HELD AT PLEASANTON THIS WEEK

Final plans for the St. Augustine's church bazaar to be held at the Forester's hall, Pleasanton, on October 6 and 7 were discussed at a special committee's meeting held at Parish hall last Wednesday evening.

Every committee working on the bazaar gave a report on their work. Father Viladomat is general chairman of the affair. He is being assisted by a number of women in the Parish.

The bazaar will open at one o'clock Friday afternoon and will be open Friday and Saturday evenings. It is expected that it will be open all day Saturday.

Booths at bazaar will consist of ice cream, refreshments, plain sewing and fancy sewing booths, and market booths.

The chairmen and members of the committees working on the affair are as follows:

Candy, ice cream and grab bag booth—Miss Victoria Bianchi, chairman, assisted by Miss Evelyn Bell, Miss Norine Bianchi, Miss Doris Grana, Miss Daphne Peters, Miss Dorothy Bairos, Miss Gladys Rose, Miss Betty Sobella, Miss Annette Giorgis, Miss Anne Giorgis, Miss Velma Andrade, Miss Mary Fuchs, Miss Elsie Andrade, and Miss Freda Garibaldi.

Plain sewing booth—Mrs. Con Nevin, chairman, Mrs. J. R. Cronin, Mrs. E. Ferrario, Mrs. J. E. Silva, Mrs. M. R. Paulo, Mrs. M. M. Lopez, Mrs. Kate Brandstetter, Mrs. Mary Silveria, Mrs.

Rose George, Mrs. Maryana Andrade, Mrs. Manuel Amaro, Mrs. S. J. Jackson, Mrs. Manuel Rose, Mrs. J. G. Rose, Mrs. Tony Rabello, Jr., Mrs. C. Bernal, Mrs. E. Reimers, and Miss K. Tehan.

Embroidery booth—Mrs. Frank Nevis, chairman, assisted by Mrs. M. J. McDermott, Mrs. John Dutra, Mrs. Joe Bairos, Mrs. Frank Garatti, Mrs. M. DePonte, Mrs. F. W. Brenner, Mrs. Joe Vizzolini, Mrs. F. Fracisco, Mrs. R. Bell, Mrs. W. J. Martin, Mrs. W. F. Sylvia, Mrs. L. Perry, Mrs. A. Rivolta, Mrs. Joe Joseph, Mrs. Frances Frager, Mrs. C. Cabral, Mrs. A. B. Silva, Mrs. Manuel Rose, Mrs. F. Vargas, Mrs. M. Terra, Mrs. M. I. Silva, Mrs. G. Sobella, and Mrs. J. B. Lee.

Refreshment—Mrs. James George and Mrs. C. Bedsworth, chairmen, assisted by Mrs. H. E. Dickinson, Mrs. A. Machado, Mrs. M. Regalia, Mrs. L. M. Locke, Mrs. Anna Nevis, Mrs. M. Soito, Jr., Mrs. Alex Higuera, Mrs. F. Willis, Mrs. Chas. Smith, Mrs. C. H. Schween, Mrs. M. G. Oliveria, Mrs. A. Regalia, Mrs. F. Avilla, Mrs. J. J. Delucchi, Miss Margaret Amaro, Miss Elsie Corcoran, Miss Mary Muniz and Miss Bernice Lewis.

Market booth—Mr. and Mrs. N. DeBolt, chairman, assisted by Mrs. Mary Andrade, Mrs. Mary Vargas, Mrs. Chas. Smith, and Miss Evelyn Smith, all of Pleasanton.

Amador Dons Are Defeated In Practice Game

For the first time in six years the Amador Dons fell to a defeat at the hands of the Castlemont Reserves in a football practice game played at the Amador field recently.

For six consecutive years the score between Amador and Castlemont has been six to nothing, and five of these years the score favored the Dons with the exception of this year, when Castlemont crossed Amador's goal line to break the Don's winning streak.

Forward passes, that for some unknown reason the inexperienced Dons failed to check, allowed the Crusaders much ground. Line plays and end runs were continually being stopped behind the line of scrimmage. It was the Dons end that were not sensing the lateral and forward passes that made the game.

The Varsity did well as a whole and the six Varsity subs did equally well. The mistakes were made when a full second team was on the field. About five inexperienced players were unable to cope with the attack. Since this was Amador's first game of the season and that was Castle-

mont's fourth game certain errors on the part of the Dons were bound to happen.

In all future games only single men substitutes will be made for the Dons and these will be purely for the purpose of strengthening the team or to relieve tiring players.

Coach Patterson got a fairly good idea of what to expect from his team after watching the game Thursday. The absence of James Sorensen at right end was perhaps responsible for most of the trouble. Compagna, a freshman, did as well as might be expected and will be a more finished player before the season is completed. Howell, Williams, Potvin and Hansen did some mighty fine work as reserve back field. The substitute line is where the big weakness was felt, however, the Freshmen seem to be willing and will develop in time. The three teams know their plays well but the details of execution and necessary skill is still absent.

The first league game for the Dons will be on Friday afternoon October 20 with the Livermore Cowboys at the Amador field.

American Legion Installation Is Held At Pleasanton

Ceremonies held at the Veteran's Memorial building last Friday night Mrs. Clara Nilson, president; Mrs. Helen Blacet, first vice; Mrs. Edith Trimmingham, second vice; Mrs. Myrtle Lanini, secretary; Mrs. Elizabeth Apperson, treasurer; Mrs. Lillie Florio, chaplain; Mrs. Aida Elworthy, Sargeant at arms; Mrs. Irene Stevenson, marshal; Mrs. Elizabeth Pelle, historian; Mrs. Velma Ruppel, musician; Mrs. Clara Nilson, Mrs. Helen Blacet, Mrs. Edith Trimmingham, Mrs. Josie Page, Mrs. Frances Apperson, Mrs. Mary Sanderson, and Mrs. Eleanor Ewart were elected on the executive committee.

Those who were seated for the Post were as follows: Morris Elsnab, past commander; Ray Ewart, commander; Clay Elworthy, first vice; Adolph Banke, second vice; L. Ruppel, treasurer; Ollie Page, chaplain; Ralph

Jows; Mrs. Josie Page, past president; Mrs. Clara Nilson, president; Mrs. Helen Blacet, first vice; Mrs. Edith Trimmingham, second vice; Mrs. Myrtle Lanini, secretary; Mrs. Elizabeth Apperson, treasurer; Mrs. Lillie Florio, chaplain; Mrs. Aida Elworthy, Sargeant at arms; Mrs. Irene Stevenson, marshal; Mrs. Elizabeth Pelle, historian; Mrs. Velma Ruppel, musician; Mrs. Clara Nilson, Mrs. Helen Blacet, Mrs. Edith Trimmingham, Mrs. Josie Page, Mrs. Frances Apperson, Mrs. Mary Sanderson, and Mrs. Eleanor Ewart were elected on the executive committee.

JUDGE C. GALE HAS BUSY SESSION TUESDAY

Preliminary hearing for Frank Judd, of Orton, who is being charged with driving while intoxicated was held last Tuesday morning at the Pleasanton Justice Court.

Judd was arraigned before Judge Charles Gale last Tuesday. He was arrested by traffic officer Anthony Enos, who claims that Judd ran into another car near Dublin. Judd is said to have used profane language before the ladies that were in the car he ran into.

He was arrested last Sunday and turned over to Constable Albert E. Vervais, Pleasanton township constable and was lodged in jail.

Aside from the arraignments conducted by Judge Gale Tuesday fifty-five dollars was collected in fines and two cases continued.

C TEAM BASKETBALL IS STARTED AT AMADOR

Class C basketball for the Amador lightweights started this week when the Dons played against the Hayward High C team in a practice game at Hayward last Tuesday. The Dons were defeated by the Hayward boys by a score of thirteen to ten. Since the C team league play is on Thursday afternoon during the football season the coaches arranged to have the league play started earlier than usual for the C teams. Varsity and B team basketball will not start till November 13.

Considering the fact that the Dons have had hardly no practice and that they were opposing a far superior team, the Don lightweights did rather well in letting their opponents score only three extra points over their quota, Tuesday.

The score at the end of the first quarter found the Dons with three and Hayward, five. At the half Hayward had seven and the Dons five.

At the end of the third quarter the score was tied with seven up. Hayward reserves gave their players a breathing spell. In the last quarter the Dons were tired out as they were not used to playing a full game. The game Tuesday was played in eight minute quarters rather than the six minute quarters which are regular league periods.

In the final quarter Hayward scored six points to Amador's three. The game ended 13 to 10 with the Dons on the short end. Hayward scored most of their points in their first and last quarter.

The Dons played rather steady through the whole game. Their one handicap was the failure to make foul shots count which cost them a chance to win.

The lineup was:

Tercentenary of Vauban Death Marked in France

The celebration of the tercentenary of the death of Vauban included a special memorial exhibition, but it also drew, writes a Paris correspondent of the London Sunday Observer, attention to a remarkable collection of models of the fortifications designed by him, which has been stored on the upper floor at the Invalides for the last 150 years.

Until 1920 these models, which were supposed to have some importance as military information, could not be visited by the general public, but as the war destroyed the last vestige of confidence in the modern efficacy of Seventeenth century fortifications, they can be examined by anyone who cares to climb the four flights of stairs.

There are more than 200 of them. They are carved by hand in walnut and every tree which was standing when they were made is shown upon them, the scale being 1 to 600. They were originally ordered by Louis XIV in order to show Louis XIV how the scheme of frontier defense was being carried out. Many of the actual fortresses have disappeared, but some British soldiers will remember the one at Doullens, which served as a Canadian hospital.

Hoopsnake Does Not Roll and Has No Tail Stinger

One of the most persistent snake myths in the United States deals with the reptile known as the hoopsnake or hoopsnake. According to the belief it has a venomous stinger in its tail which works like that of a wasp. The snake, it is said, forms itself into a hoop by putting its tail in its mouth and rolls along like a wheel. It travels with incredible swiftness, and when it gets close enough to a victim it lets go its tail and drives the stinger into the object of its attack. If the victim dodges, according to the myth, and a tree is struck instead, the tree is sure to die. One version has it that the hoopsnake is inflated and that it is luminous at night.

There is no snake which rolls along like a hoop, and there is no species of snake with a stinger in its tail. The snake known as the hoopsnake, or horn snake, is harmless. It is bluish-black, with a few red bars across its under parts and its tail tapers to a fine point, having the appearance of a horn or spike, but it is incapable of piercing or stinging anything.

Cellophane

Cellophane looks like Isinglass, or like celluloid, and is known as glass paper and as transparent cellulose sheeting. It is transparent, thin, tough and moisture and greaseproof, and while airtight, permits the customer to see exactly what he is buying. It is not a new product, but developments in the chemical industry have made production possible in quantities and at a price which permits general use. Wood or cotton provides the base. The ash, coloring matter and other impurities are removed, leaving only the pure vegetable fiber, or cellulose, which is treated with caustic soda and sulphuric acid of carbon. This results in viscose, the liquid which is glass paper after being forced through a very narrow slit and cooled. It is no more inflammable than ordinary paper. It is manufactured in various forms and sold under various trade names.

Contented Cows Give More Milk

Cows in Holland which have been provided all the comforts of a modern home show their gratitude by giving more milk. They have the best of food, their sheds are heated in winter, and if the winds are cold they even wear overcoats when they go out. The floors of the cowsheds are laid with shining white tiles, which are kept spotlessly clean, and in many of the sheds there may even be lace curtains. The cow's horns are scrubbed and polished and her coat is groomed until it is glossy. In the dark months of the year the sheds are lighted with electricity, so as to make things cheerful for the bossies.

Chinese Tree Goes to Sleep

The Chinese mimosa or silk tree, blooms throughout the summer months as if it were rooted in the soil of China, its native land, rather than in the ground of its adopted country. The silk tree's blossoms are delicate little sprays of a deep pink that grow in clusters and then fall off to form a magic carpet below. The leaves, tiny green ovals, which grow on either side of a long stem, react to darkness much as a sensitive plant does to touch. When the sun goes down, they fold up and await coming of day again.

Public and Private Good

At root, the foundation of morality is discovered to be the public and private good.

Rose Popular in England

The most universally grown flower in England is the rose.

SALMON A FISH OF GREAT VALUE

Supports a Vast Industry on Pacific Coast.

Prepared by National Geographic Society, Washington, D. C.—WNU Service.
SOME two thousand Chinook salmon from the Pacific coast, which were hatched in the aquarium of Washington's new Department of Commerce building, will be placed in Deep Creek lake, Maryland, whose waters drain into the upper Potomac. It is hoped the fish will find their way to salt water and return, in four years, to spawn, thus stocking the historic river.

Pacific salmon are the most valuable fishes, not only of the United States but also of the entire western hemisphere; and with the single exception of the sea herring, they are commercially the leading fishes of the world.

In one year the aggregate catch of salmon in the Pacific states, British Columbia and Alaska was upward of four hundred million pounds; which, as sold in a canned, salted, smoked, frozen and fresh condition, had a market value of about \$27,500,000. The canned product alone, consisting of more than five million cases of 48 one-pound cans, was worth \$25,500,000. Thirty-five thousand people were engaged in the different branches of the industry, and the invested capital was fully \$30,000,000.

There are five distinct species of salmon, which, having many characteristics in common nevertheless differ strikingly in size, color, habits, distribution, food value, and economic importance. The largest and most magnificent of all salmon is the Chinook, Quinnet, King, Spring, or Tyee salmon. It has an average weight of nearly 25 pounds in the Columbia river, and is often caught weighing 40 to 60 pounds, while occasionally examples of over 100 pounds are taken. While found from California to China, it attains its greatest abundance in the Sacramento, Columbia, Yukon and other large streams.

Blueback Has Its Faults.

The species called Blueback salmon on the Columbia, Sockeye on Puget Sound, and Redfish or Red Salmon in Alaska, averages only five pounds in weight and never exceeds twelve. It attains

A Chinook Salmon.

greatest abundance in the Columbia, the Fraser, and in various streams throughout Alaska. Its meat is rich in quality, deep red in color, and the fish is therefore in great demand for canning. While a beautiful fish when in salt water, with bright blue back and silvery sides, after entering fresh water it deteriorates rapidly in food value and appearance, the head turns to olive green, and the entire back and sides become crimson and finally dark blood red.

The Silver or Coho salmon, with

a general distribution in the coastal streams, averages six pounds in weight and rarely exceeds 25 or 30.

The smallest species is the Humpback, so called from the well-marked hump developed by the male in fall. The extremes of weight for mature examples are three and eleven pounds, with four pounds as the average. The region of greatest abundance is Puget Sound to southeast Alaska.

The remaining species, the Dog or Chum salmon, averages eight pounds in weight. It is generally distributed and abundant, but, owing to the poor quality of the flesh, is the least important of the group. The distortion of the jaws in the male during the breeding season, while characteristic of all species, is particularly marked in the Dog salmon.

Where They Spawn.

The differences in spawning times and places of the different species of salmon are most interesting. After spending most of their lives at sea, growing, accumulating fat, and storing energy, the salmon move inshore and ascend the streams. After once beginning their upward journey, they take no food, and in fact are incapable of digesting and assimilating food.

The Quinnet salmon begins to run in spring and pushes its way to the headwaters of the larger streams. In the Columbia basin the species distributes itself over 90,000 square miles of Washington, Oregon, Idaho, and Montana, its upward limit being insurmountable obstructions or falls. In the Snake river and Yukon river the spawning grounds lie 2,000 miles by water from the sea.

The spawning streams of the Red salmon are those that rise in lakes, and the spawning grounds are in the affluents of those lakes. The run begins in May and fish continue to come in until October, depending on latitude.

The Silver salmon enters the streams from July to October or November, but does not as a rule ascend for long distances.

The Humpback runs into fresh water in summer and fall, preferably in short coast streams, and often spawns within a few rods of the ocean.

The schools of Dog salmon come into the stream rather late; in the Columbia river and Puget Sound the run extends from August to late in November, and in Alaska the height of the season is about the first of September.

Now, whether the salmon travel in the streams 2,000 miles or 200 feet to reach their spawning grounds, and regardless of their physical condition at the time they arrive at the particular places required for the proper development of eggs and young, every individual of every species dies shortly after spawning. This is the most characteristic and remarkable event in the life of the Pacific salmon.

Why this is the case is one of nature's mysteries. It has its parallel in some other fishes, in the may-fly, which perishes after a few hours' existence, and in the annual plants. One can only say of such that they have served their purpose and are no longer needed.

While the Pacific salmon run with more or less regularity, year after year, two of the species exhibit, in particular streams or regions, a marked periodicity in abundance which is so well established that it can be predicted with certainty years in advance.

Artificial Propagation.

The artificial propagation of salmon in the streams of the Pacific seaboard began at a comparatively early date and has continued with yearly increasing extent and importance, so that at the present time more hatcheries are devoted to the Pacific salmon than to any other fishes of the western hemisphere.

The first salmon hatchery in the West was established in 1872, on the McCloud river in California. By Executive order there was set aside a large tract for a "piscicultural preserve," which was fittingly named Baird, after the first national commissioner of fisheries; and Livingstone Stone, a pioneer

Smilin' Charlie Says

"There's a lot o' folks who can't talk about any thing—but th' weather—in most o' them 're poor at that, even—"

fish culturist, was placed in charge and continued in that capacity for many years, overcoming many obstacles, undergoing many privations, repeatedly subjected to great danger from attacks of Indians and outlaws, while devising methods which showed the possibilities of salmon culture and led to the present extraordinary development of this art.

The original Baird hatchery, still in active operation, is now supplemented by numerous other government stations, which may be regarded as lineal descendants.

The eggs of the salmon are .2 to .25-inch in diameter, and are the largest handled by the fish culturist. They are easily obtained by intercepting the fish on their way to the spawning grounds by means of racks, traps, seines, etc., and then, when exactly ripe, by expressing by firm pressure on the abdomen.

Not Easy to Handle.

The size and activity of the salmon make it necessary for two or three men to work together in holding the fish and relieving them of their eggs and milt, and the largest individuals are most readily managed by putting them in a strait jacket.

In view of the inevitable death of the salmon after spawning, an improvement over the old method of forcible expulsion of eggs is the stunning of the fish by a blow on the head and taking of the eggs by abdominal suction. This, while greatly facilitating the work of the spawn-takers, adds approximately 10 per cent to the egg yield by the saving of eggs that would ordinarily be left in the abdominal cavity.

Salmon eggs hatch slowly. Incubation, beginning in late summer or early autumn, continues until the following spring or summer, depending on the temperature of the water. The most protracted period of incubation thus far coming to the notice of fish culturists is that of the red salmon at Karluk, Alaska, where eggs taken in September may not hatch until the following May or June, and in certain seasons the hatching time has been prolonged to 270 days.

The annual deposits of young salmon in the waters of the Pacific seaboard by the bureau of fisheries, the three coast states, the Province of British Columbia, and the private hatcheries in Alaska now total many millions, of which the largest quantity represents the work of the federal government.

Advice

"Advice," said Uncle Eben, "is like medicine. You gets worse and worse off if you tries to take too many different kinds."

Invented Printing of Music

Ulrich Hahn of Rome invented the printing of music in 1476.

The Moral Life

The moral life enjoins the best use of all our opportunities.

PENGUIN MOST AMUSING BIRD

Life and Habits of This Queer Polar Resident.

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

THE penguin colony of the London zoo recently presented a new problem to its keepers when these natives of frigid Antarctica suffered from bronchitis. Among other things, mufflers were provided in an attempt to save the birds, which are worth several hundred dollars a pair.

While there are several species of penguins, the Adelle of Antarctica, which was a source of amusement to members of the Byrd South Pole expedition, is, perhaps, the most entertaining.

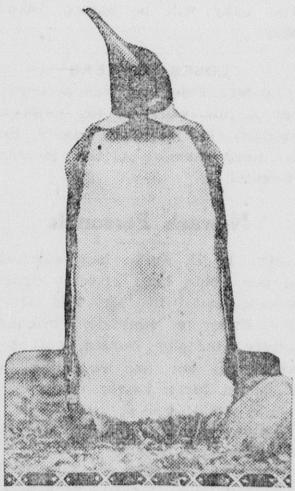

The Adelle penguin resembles nothing so much as a solemn, round little old gentleman in starched shirt and swallow-tail coat. And the bird's habits are as strange as his appearance. He spends his whole allotted span within the Antarctic Circle, supplying that desolate region of ice and snow with one of its few notes of life. His wings are water-wings, which serve him for naught in the air.

Like man, he proposes to the lady of his heart by proffering her a stone. He walks erect, toddling along with precise and preoccupied mien, as though bent on some most important business, but more often than not this attitude is only a pose. Time is really no object to him, and after hurrying away in one direction he is likely to turn and retrace his steps or dash away in some other. Perhaps he may even stop suddenly and, tucking his head beneath a flipper, go calmly to sleep.

If pursued or desirous of moving over soft snow in a hurry, he turns himself into a toboggan by dropping down on his smooth-feathered breast and skidding gayly along, propelled by both feet and flippers. Indeed his idiosyncrasies are legion, and they make him the most interesting of Antarctic creatures and endear him to every explorer of the desolate South Polar regions.

Belongs to a First Family.

This strangely manlike bird is truly an F. F. A. (First Family of the Antarctic), tracing his ancient lineage back to those halcyon days of the earth's youth before the coming of the great glaciers.

The Penguin, Interesting Resident of Antarctica.

Then, in a temperate or perhaps even tropical climate, it is probable that his ancestors flew like other birds. But as centuries passed into ages and cold crept over the land, killing all vegetation, the penguins were forced to seek sustenance in the sea. Eventually their wings adapted themselves to the new mode of life and became the flippers that they are today.

Adelle is a gregarious creature, and in October and November (the Antarctic spring) he congregates, along with countless thousands of

his kind, in great rookeries. There the age old business of choosing a mate is his first consideration; but, as with true love elsewhere, the course of his romance is not always smooth.

After deciding in his own mind on the lady he would wed, he must not only win her favor but also vanquish whatever rivals may present themselves. In achieving the first of these designs, he takes a small stone in his beak and lays it humbly at the lady's feet. This gift is accompanied by a soulful gaze from his white-rimmed eyes and an unmelodious "quaark" from the bottom of his heart.

Very likely he will have to repeat this performance a number of times before he succeeds in breaking through her bashful feminine reserve; but he is nothing if not persistent, and finally she yields to his importunities to the extent of giving him a critical glance. Thus encouraged, he assumes his grandest posture and invites further inspection. If he pleases her, the lady squawks her approval, he adds his vocal efforts to make it a duet, and both sway and stretch and gaze heavenward in an ecstasy of penguinial bliss.

But gentlemen penguins are not only good lovers, they are extremely pugnacious as well, and when more than one Romeo is attracted to the same Juliet, a merry fracas is likely to ensue. With beaks and flippers they go for each other, delivering vicious cuts and stabs and raining blows about them with such speed that the eye can hardly follow. If the fair object of all this excitement has a preference for one of the combatants, she may enter the fray on his side; but more often she will sit serenely by while her admirers do battle. Eventually one of them will beat a forced retreat and leave the spoils of war to his conqueror.

After courtship comes the important business of nest-building; and this, too, is accompanied by much ado. An Adelle's nest consists of a loose pile of small stones, quite unadorned or softened with lining; but, unfortunately for the peace of the avian community, there is not in the near vicinity a sufficient supply of such building material to go around. Then does temptation enter into the life of a penguin. His soul is filled with a great desire and he longs to supply his wife with more and better stones for the construction of their little love nest, but there are none to be had, with honor.

Soon he covets those within his neighbor's stone pile, and, having thus broken one commandment, he skids farther along the downward path and before long is engaged in taking what he can while the neighbor isn't looking.

Constant vigilance is the price that must be paid for keeping a stone bungalow under one's feathers in a city of penguins.

After the newlyweds have become proficient enough at the gentle art of purloining stones to be able to maintain a nest, two eggs are laid and the process of incubation commences. This lasts about a month, with both birds participating, for they have a strong parental instinct and sit patiently for long hours at a time to protect their eggs from the harsh Antarctic blasts.

While sitting on the nests, hen birds amuse themselves by attempting to reach out with their beaks and lift a stone from the pile next door. If detected, and they frequently are, this is a signal for a squabble, and, without leaving their nests, the two ladies try to bite out each other's tongues. Happily, they seldom succeed.

Chicks Are Always Hungry.

When hatched, the chicks are little balls of sooty down, and they wear their "baby clothes" for some weeks before exchanging them for suits of feathers. They start getting hungry soon after they are hatched, and continue in a state of unappeased appetite as long as there is the smallest empty space within their elastic young bodies.

Adelles live largely on a small, red, shrimplike crustacean which

occurs in amazing numbers in the Antarctic seas. There is little or nothing for them to eat on the land, and therefore, until the chicks are fully developed and able to take care of themselves in the water, they must be fed. This their elders accomplish by means of regurgitation.

The bogy man for baby penguins takes the form of a skua gull. This unpleasant bird conceives its mission in life to be the prevention of overpopulation among the Adelles, and woe be unto the unwary chick which wanders away from its comrades. A marauding skua will drop down beside it and with a few savage blows of its strong beak end the chick's earthly career and feast upon the remains.

Adelles have never been successfully transplanted from snowy wastes. However, some of their cousins have survived the milder temperatures of Europe and America and are to be found in certain of the larger zoological gardens.

One may visit a pair at the National Zoological park at Washington, D. C., and find them well disposed. As you enter the inclosure both of them come forward with grave and dignified demeanor and emit "quaarks" of greeting. Coming closer, they give you a careful inspection, out of first one eye and then the other, and then sit down with an air of resignation and an expression of utter boredom. Your feelings are a bit ruffled until the keeper assures you that their behavior is due to the keen disappointment they experienced on finding that you were not a fish.

When the new wing of the birdhouse at the Washington zoo is built, one end of it is to hold a large glassed inclosure. Within this, ice machines are to create an Antarctic atmosphere, in which it is hoped that a colony of penguins will live and flourish. Perhaps science will yet devise a means whereby those of us who cannot well travel to the South pole may nevertheless enjoy the captivating drollery of the Adelle penguin, most interesting residents of Antarctica.

Sphere of Influence

A sphere of influence is a territory within which the political influence or the interests of one nation are permitted by other nations to be more or less exclusive. The term is loosely used, especially of regions more or less under the control of a nation, but not constituting a formally recognized protectorate or suzerainty.

St. Bernard Dogs

There are two types of St. Bernard dogs: the rough and smooth coated. Both are similar in build and body structure, differing principally in the texture of the coat. They have been known to weigh as much as 250 pounds.

Ships Through Panama Canal

It requires from eight to ten hours for a ship to pass through the Panama canal. The length of the canal is 44 nautical miles. There are three locks, and ships are taken through the canal during the day.

Not "These" Kind

The word "kind" is singular. If modified, the demonstrative pronouns "this" or "that" must be used and not "these" or "those." The latter two are the plurals of "this" and "that."

Temperature of Northernmost City

The January temperature of Hammerfest, northernmost city of the world, is about that of Berlin, 1,300 miles to the south, due to the waters of the warm Atlantic drift.

Don't Want Lions Scared

Whipsnake zoo in England had a huge chalk figure of a lion cut in the ground to warn airmen not to fly too low and terrify the beasts with the hum of their motors.

Human Nature Unchanged

In the modern age human nature remains very much as it was in former times; but intellectual habits and methods have changed fast and progressively.

COMPOSITE LEGION-LION TEAM LOSES TO NEWARK J & F'S

Championship Team Too Fast For Valiant Combination

The Newark J & F's played against a team composed of men from the Lions and Legion, and won by a score of 10 to 6 on Sunday.

Bristow, pitching four innings for the Lions and Legion, struck out two and allowed six hits. De Leon, also for the Lions and Legion, pitched four innings, striking out none and allowing five hits.

Silva, J & F pitcher, struck out seven and allowed four hits in five innings. Wilson, who also pitched for the J & F's, struck out seven men and allowed four hits in four innings.

Regli, third baseman for the Lions and Legion, secured two two-base hits, getting four hits out of five times at bat.

DeValle, Newark centerfielder, hit three doubles. He secured three hits out of four times at bat. William Robinson, Newark third baseman, hit a home-run and two-base hit. Maderios, playing rightfield for the J & F's, was up at bat twice and secured a hit each time.

The lineups and box score are as follows:

NEWARK	A.B.	R.	H.
Robinson, ss	3	1	1
Lazarine, rf	3	2	1
Ornellas, lf	4	1	0
W. Robinson, third	5	2	2

Calvin Oliveria is Altar Boy for Father, Bray, of Newark.

Newark People Attend Shower For Local Girl

Mr. and Mrs. E. Frick, Mr. and Mrs. S. Oliveria and Mr. and Mrs. A. Hempleman, all of Newark, attended a Kitchen Shower for Rose Dutra and Charles Correa, nephew of the family, at the home of Mr. and Mrs. Mills, of San Jose, where 50 guests were present. A mock wedding was performed by some of the guests and a lovely midnight supper was served. The tables were beautifully decorated in pink and green.

The pair received many lovely gifts. After dancing the guests enjoyed playing bridge. Miss Dutra is the daughter, of Mr. and Mrs. J. Dutra, of San Jose. Charles Correa, is the son of Mr. and Mrs. Frank Correa, a well known nursery man from San Jose. Mr. Correa also was a nursery man for many years at the California Nursery Company, in Niles. He has his nursery located on Alum Rock avenue, San Jose.

ALPHA SIGMA MEET

The following members of the children of Mary Sodality, Newark, attended a meeting of the Alpha Sigma society in San Jose Sunday: Marie Adele, and Ernestine Alvarez; Lillian Freitas; Minnie Rivers; and Patsy Barton. At the meeting an election of officers was held and Lillian Freitas, of Newark, was elected treasurer.

BIRTHDAY DINNER

Alex de Knoop, Jr., celebrated his 15th birthday by a dinner at his home on October 1st. The following attended the dinner: Mr. and Mrs. Maaskant, Mrs. Thelma Thompson, Miss Etterbeck, Mr. Abe and Mr. and Mrs. Henry de Vries.

DAUGHTER BORN

Mr. and Mrs. Fred Reider are the proud parents of a baby girl weighing 8 pounds, born Sunday at the San Jose hospital, both mother and baby are doing well. The baby will be named Diana May.

LOSES FINGERS

Edward Feliciano was seriously cut at his work in the Graham Foundry. He lost four fingers. He is doing nicely at the Merritt Hospital.

Newark Personals

Mrs. H. U. Fuller has returned to her home here after a three week's visit with Mr. and Mrs. Bert Fuller, of Blairsden, Plumas county. Her son, Donald, who accompanied her has remained in Blairsden for a longer visit.

Julius Viegall enjoyed fishing in Santa Cruz Sunday.

Captain Stow, of Old Ironsides, was a luncheon guest of Mr. and Mrs. J. F. Silva on Wednesday. Captain Stow also visited in Centerville and Livermore.

Miss Elsie Haley, of San Francisco, spent the week-end with her aunt, Mrs. Flaherty.

Mr. and Mrs. J. F. Silva entertained Mr. and Mrs. Joe Escobar and Mr. Manuel George at a dinner, Sunday.

Mr. and Mrs. Tresscott, and family spent Monday evening with friends in San Jose.

Mr. and Mrs. T. Carver, of Newark, are entertaining Mr. and Mrs. E. M. Carver and daughter, Ruth, and son, Dexter, and Mr. Freeman, of Pomona, and E. W. Lyons, of Palo Alto, at their home.

Mrs. Kettman accompanied her son, Edward, Lillian Freitas, Edith Meneze and Patsy Barton to San Jose last Wednesday evening to attend a lecture on Gregorian singing.

Denny Wiley of Oakland is engaged in cleaning up the premises about the Newark Hotel, owned by A. A. Silva. After being put in good shape, the hotel will be opened for business.

Mr. and Mrs. T. A. Silva left Tuesday for Redwood City where Mr. Silva will begin fall plowing on the large tract of land seeded by him last fall.

Newark Personals

The Hetch Hetchy pipeline is advancing quite rapidly between Mission and Irvington. It has put about thirty men at work.

Ed Feliciano, a resident of Mission San Jose, suffered the loss of four fingers from his left hand last Friday in an accident in the Wedgewood Foundry where he had been employed for some time. Later it was found necessary to amputate the hand. Feliciano is a popular member of the Newark baseball team.

Louis Ruschin, Jr., returned the first of the week to his studies at Stanford where he will be a senior.

Miss Erta Fraesher and mother of Fresno visited briefly in Newark Monday evening. Miss Fraesher, drove up from Fresno to make application for the position in the local school caused by the death of Miss Laudenschlager.

John Freitas, Pete Freitas and Anthony Knobles were members of a clamming party at Watsonville Saturday evening.

Miss Barbara Laudenschlager under the care of Dr. Holeman is doing very nicely. Miss Laudenschlager will have to remain in bed for two or three weeks.

Mr. and Mrs. H. Andrews attended a fancy dress ball in Oakland Saturday night.

Mr. and Mrs. Tony Martin are this week being congratulated on their marriage in Reno last week. Mrs. Martin is the former Miss Ruth King of Newark.

CATTLE THIEVES CAUGHT NEAR SUNOL THURSDAY

Two men giving their names as Henry Hoekstra and Marshall Rutherford are being charged with grand theft to a complaint sworn to by Frank Silva, of Sunol. Preliminary hearing of the case was set for 9:30 Saturday morning at the Pleasanton Justice Court.

The two men were caught killing a calf belonging to Frank Silver last Thursday afternoon near the Indian creek. Leo Lynn and Jack Pickford, riders for Hugh Walker, Sunol cattleman, caught the boys when they were trying to escape shortly after they had shot and butchered the calf.

Lynn notified Constable Albert E. Vervais and Hugh Radbruch, deputy sheriff, both of Pleasanton, who went to Sunol and brought the boys to Pleasanton. L. E. Van Patten, deputy sheriff of Livermore, was notified and assisted Vervais in questioning the lads. The two boys have been confined to the county jail and will remain there until their trial.

The calf was five months old, white faced Hereford. A number of cattlemen in that vicinity have missed a number of calves in the past several months.

Register for better printing.

Why Hospitals Use a Liquid Laxative

Hospitals and doctors have always used liquid laxatives. And the public is fast returning to laxatives in liquid form. Do you know the reasons?

The dose of a liquid laxative can be measured. The action can be controlled. It forms no habit; you need not take a "double dose" a day or two later. Nor will a mild liquid laxative irritate the kidneys.

The right liquid laxative brings a perfect movement, and there is no discomfort at the time, or after.

The wrong cathartic may keep you constipated as long as you keep on using it! And the habitual use of irritating salts, or of powerful drugs in the highly concentrated form of pills and tablets may prove injurious.

A week with a properly prepared liquid laxative like Dr. Caldwell's Syrup Pepsin will tell you a lot. A few weeks' time, and your bowels can be "as regular as clockwork." Dr. Caldwell's Syrup Pepsin is an approved liquid laxative which all druggists keep ready for use. It makes an ideal family laxative; effective for all ages, and may be given to the youngest child.
